🌐 DNS

- <u>Amass</u> - The amass tool searches Internet data sources, performs brute force subdomain enumeration, searches web archives, and uses machine learning to generate additional subdomain name guesses. DNS name resolution is performed across many public servers so the authoritative server will see the traffic coming from different locations. Written in Go.
- <u>Columbus Project</u> - Columbus Project is an advanced subdomain discovery service with fast, powerful and easy to use API.
- <u>findsubdomains</u> - Automatically scans different sources to collect as many subdomains as can. Validate all the data through various tools and services to provide correct results without waiting.

in <u>Bhaskar Soni</u>

🔧 Other Tools

- <u>Barcode Reader</u> - Decode barcodes in C#, VB, Java, C\C++, Delphi, PHP and other languages.
- <u>Belati</u>
- <u>BeVigil-CLI</u>
- <u>CantHide</u> - CantHide finds previous locations by looking at a given social media account.
- <u>CrowdSec</u>
- <u>Datasploit</u> - Tool to perform various OSINT techniques on usernames, emails addresses, and domains.
- <u>Discoshell</u>
- <u>DuckDuckGo URL scraper</u> - A simple DuckDuckGo URL scraper.
- <u>eScraper</u> - Grab product descriptions, prices, image
- <u>FOCA</u>
- <u>Glit</u> - Retrieve all mails of users related to a git repository, a git user or a git organization.
- <u>Greynoise</u> - "Anti-Threat Intelligence" Greynoise characterizes the background noise of the internet, so the user can focus on what is actually important.

🔧 Other Tools

- <u>Hunchly</u> - Hunchly is a web capture tool designed specifically for online investigations.
- <u>Intrigue Core</u> - Framework for attack surface discovery.
- <u>LinkScope Client</u> - LinkScope Client Github repository.
- <u>LinkScope</u> - LinkScope is an open source intelligence (OSINT) graphical link analysis tool and automation platform for gathering and connecting information for investigative tasks.
- <u>Maltego</u> - Maltego is an open source intelligence (OSINT) and graphical link analysis tool for gathering and connecting information for investigative tasks.
- <u>OpenRefine</u> - Free & open source power tool for working with messy data and improving it.
- <u>Orbit</u> - Draws relationships between crypto wallets with recursive crawling of transaction history.
- <u>OSINT Framework</u> - Web based framework for OSINT.
- <u>OSINT-Tool</u> - A browser extension that gives you access to a suite of OSINT utilities (Dehashed, Epieos, Domaintools, Exif data, Reverse image search, etc) directly on any webpage you visit.

<u>in</u> <u>Bhaskar Soni</u>

🔧 Other Tools

- QuickCode - Python and R data analysis environment.
- SecApps Recon - Information gathering and target reconnaissance tool and UI.
- SerpApi - Scrapes Google search and 25+ search engines with ease and retruns a raw JSON. Supports 10 API wrappers.
- SerpScan
- sn0int - Semi-automatic OSINT framework and package manager.
- SpiderFoot - SpiderFoot Github repository.
- SpiderSuite - An advance, cross-platform, GUI web security crawler.
- Sub3 Suite - A research-grade suite of tools for intelligence gathering & target mapping with both active and passive(100+ modules) intelligence gathering capabilities.
- The Harvester
- Zen - Find email addresses of Github users urls and other data effortlessly

🛡️ Threat Intelligence

- **GitGuardian - Public GitHub Monitoring** - Monitor public GitHub repositories in real time. Detect secrets and sensitive information to prevent hackers from using GitHub as a backdoor to your business.

- **OnionScan** - Free and open source tool for investigating the Dark Web. Its main goal is to help researchers and investigators monitor and track Dark Web sites.

- **OTX AlienVault** - Open Threat Exchange is the neighborhood watch of the global intelligence community. It enables private companies, independent security researchers, and government agencies.

- **REScure Threat Intel Feed** - REScure is an independent threat intelligence project which we undertook to enhance our understanding of distributed systems, their integration, the nature of threat intelligence and how to efficiently collect, store, consume, distribute it.
